

Software Engineer – Integration

We are seeking a talented and motivated Software Engineer (Integration Developer) to join our team. The ideal candidate will have a solid background in software development, experience with integration platforms, and a strong understanding of APIs and web services. This role involves working on integrating various systems, debugging, and ensuring seamless data flow across platforms.

Responsibilities:

- Develop and maintain integrations using platforms such as Celigo integrator.io, tray.io, or similar.
- Work with RESTful APIs and SOAP web services to integrate different systems.
- Debug and troubleshoot REST and SOAP web services to ensure seamless data flow.
- Utilize JavaScript and its libraries to enhance integration processes.
- Apply knowledge of data structures, algorithms, and object-oriented design in development tasks.
- Collaborate with cross-functional teams to understand integration requirements and deliver solutions.
- Continuously learn and apply new skills to solve complex integration challenges.
- Communicate effectively in English with team members and stakeholders.

Requirements/Qualifications:

- Bachelor's or Master's degree in Computer Science, Engineering, or related field.
- Minimum 2-3 years of experience working in the software industry.
- Working with Celigo integrator.io, tray.io, or similar integration platforms.
- 2+ years of Professional experience with JavaScript & its libraries.
- Strong knowledge of Restful APIs and SOAP web services, JSON, and XML structure.
- Debugging REST and SOAP web services.
- Working with Celigo integrator.io, tray.io, or similar integration platforms.
- Strong understanding of Data Structures, Algorithms, and Object-Oriented design.
- Strong teamwork, self-learning, and problem-solving skills.
- Good English communication skills.
