

# Software Engineer – JavaScript Developer

We are seeking a talented and experienced JavaScript Developer to join our innovative team. The ideal candidate will have a strong background in JavaScript development, a keen eye for detail, and a passion for creating high-quality enterprise-grade software. This role involves working on back-end development, ensuring optimal performance and user experience.

## Responsibilities:

- Develop and maintain web applications using core JavaScript, ES6, and Node.js.
- Design and develop enterprise-grade software with a focus on scalability and performance.
- Perform UI and backend tests to ensure optimal performance and reliability.
- Utilize web development technologies such as JavaScript, CSS, and RESTful APIs to create dynamic and interactive web applications.
- Manage source control and project tasks using tools like Jira and Git.
- Debug and troubleshoot issues across various browsers and devices.
- Write clean, maintainable, and efficient code following best practices and coding standards.
- Stay up-to-date with emerging trends and technologies in web development.

## Requirements/Qualifications:

- Bachelor's or Master's degree in Computer Science, Engineering, or a related field.
- Minimum of 2 years of professional experience with JavaScript and its libraries.
- Proficiency in core JavaScript, ES5, ES6, and Node.js.
- Strong experience in designing and developing enterprise-grade software.
- Experience with web development technologies including JavaScript, CSS, and RESTful APIs.
- Familiarity with source control and project management solutions such as Jira and Git.
- Excellent problem-solving skills and attention to detail.
- Strong communication and teamwork abilities.
